And you'll be able to find and delete all useless hidden files on your iOS device, freeing up more space available on your own. With photos, you can control which photos and videos are visible and what's hidden. When you hide photos and videos, they move to hidden albums, so they don't appear in your library, in other albums, or in the Photos widget on your home screen. With iOS 14, you can turn off the hidden album, so the photos are completely hidden. You can open photos and videos and turn on the hidden album whenever you want. Open photos. Select the photo or video you want to hide. Tap the Share button, then tap Hide. Confirm that you want to hide the photo or video. On an iPhone or iPod Touch: Open photos and tap the Albums tab. Scroll down and tap under Hidden Utilities. Tap the photo or video you want to open. Tap the Share button, then tap Unhide. On the iPad: Open photos. If the sidebar is hidden, tap the sidebar icon in the top-left corner. Scroll down until you see hiding under utilities. Tap the photo or video you want to open. Tap the Share button, then tap Unhide. On the iPhone, iPad, or iPod Touch, the hidden album is turned on by default, but you can turn it off. When you turn off the hidden album, any photos or videos you've hidden won't be visible in the Photos app. To find a hidden album: Open Photos and tap the Albums tab. Scroll down and look for hidden albums under utilities. If you are on the iPad, you may need to tap the sidebar icon in the top left corner, and Scroll down until you see the album hidden under the facility. To turn off hidden album: Go to Settings and tap Photos. Scroll down and turn off the hidden album. Open photos. Select the photo or video you want to hide. Click the photo, then select the hidden photo. You can also hide a picture of the menu bar when you Image &gt; Hide Photos. Or you can press Command-L to hide a picture. Confirm that you want to hide the photo or video. If you're using iCloud Photos, photos you're hiding on one device are also hidden on your other devices. Open photos. In the menu bar, select View &gt; Show Hidden Photo Album. In the sidebar, select Hidden. Select the photo or video you want to open. Click the photo, then select Unhide Photo. You can also select Image &gt; Unhide Photo from the menu bar, or press Command-L. The hidden album is turned off by default on the Mac. But you can turn it on at any time, so it's easier to find photos or videos I've hidden. Here's how to turn on hidden albums: open photos. Select View &gt; Show Hidden Photo Album. When the album is hidden in, you'll see it in the sidebar under the photos. Thanks for your feedback. The iPhone is like a small computer. It has a hard drive that includes preloaded programs and system files. You can access the files and data they stored on your iPhone, but there are hidden files that you can't access. If you would like to view and delete any of these hidden files on your iPhone you will have to jailbreak your phone and use a file app to view these files. Can you hide apps on an iPhone? Completely! Sometimes you need to hide apps on your iPhone from others that may snoop, or from yourself if you're addicted to a particular game or to check out your Facebook notifications like I am. With new smart iOS 14 offers for apps, you can request that an app not be suggested (thus hide the app). You can also hide an app on your iPhone using app folders. To get it even further, you can hide the app from iPhone search and in your iPhone App Store shopping history. You can even get rid of many of Apple's pre-installed apps while you're at it. Here's how to hide apps on iOS 14 on your iPhone using any of these methods, as well as how to find hidden apps on your iPhone—just in case you hide them too well. Related: How to make a private photo album to hide images on the iPhone What's in this article: How to hide apps from smart offers smart offers is my favorite new feature of iOS 14. The widget uses Siri intelligence to predict and suggest shortcut apps or suggestions for your use based on your usage patterns. However, this means that you may use suggestions for apps you prefer as often (any other trying to cut in Pokémon GO?), or that you use so often that you have already launched a separate widget for them and don't have to see them in suggestions. Here's how to hide Apps from suggested by Smart Offers: Master your iPhone in one minute a day: sign up for the iPhone Live tip of the day newsletter and we will send you the tip every day to save time and get the most out of your iPhone or iPad. Your suggestions widget will look like a normal cluster of app icons on your iPhone home screen. Press and hold the app icon you want to hide from There's a menu coming up. Don't suggest [app name] and you'll see a message down that comes up. Tap the red option that says don't suggest [the app name] and take a second or two to get your phone to respond. You just hide this app from smart offers! Simply, the app is still on your phone, it just won't have to pop out in your other smart offers widget. Back up how to hide apps using your iPhone app library includes app libraries if you are running iOS 14. We have a list of devices that can be updated to this iOS located here, so if you are using the iPhone 5, iPhone 6, or a similar older model, you may want to check the list. Here's how to hide apps in the iPhone app library, which allows you to save it away from your home screen. Press and hold the app icon for the app you want to hide. There's a menu coming up. Tap the Uninstall app, the second menu appears . Tap Move to the App Library. This will hide the app in the iPhone app library. Since it's easy to find hidden apps in the App Library, you can always change your comment and add it to your home screen later. If you're interested, here's more help in the App Library. Back up can I hide apps from the App Library? Unfortunately, iOS 14 doesn't allow apps to hide from the App Library if they remain on your iPhone. Basically users can't hide an app from the App Library without deleting or deleting the app ally from their device although they are. An app must be uninstalled and then reinstalled every time the user needs it. In rare cases this may be a necessary option, but for most people this will not be feasible. If you've decided to use this option, see our article on how to delete and delete apps, or follow the step above on to hide and select Remove app when the menu appears. Back up how to hide apps on your iPhone using app folders the best way to hide apps inside a folder is to fill the first pages of the folder with apps that you're trying not to hide. Select the folder that already exists on your iPhone (preferably a boring folder, such as utilities) or create a new app folder. Press and hold any app icon until the action menu appears select Edit Home. Keep and drag the app you've hidden in your selected folder. Drag the app to the right so you can place it on the second page of the folder (only apps are visible on the first page of the folder on the home screen). If you really want to hide apps deep inside your folders, you can create up to 12 pages in a folder until each page has an app. That means you can have a folder with 11 pages of apps you only use occasionally, and hide your apps or apps on page twelfth. This method obviously programs It doesn't hide entirely on your iPhone, but makes sure it's hard to accidentally come across them. Back up how to hide apps from iPhone search even if you hide apps deep in a folder on your iPhone, someone determined to snoop can quickly find your hidden apps using That's why it's good to know how to hide apps from iPhone search as well. In this section of the settings app we will use search to hide your app completely, including. Open Settings. Tap Siri &amp; Search. Scroll down to the app section and select the app you want to hide. Toggle off Learn from this App, Suggest App, Show App in Search, Show Content in Search, and both toggles labeled Suggest Shortcuts for App. Some magicians may disappear when you go, but it's normal only any magic that stays as you remain at the bottom of the list. Repeat for any other app you want to hide from iPhone search. To find and open an app in iPhone search, go back to Siri &amp; Search in settings app, tap the app, and change Siri's suggestions again. Back up how to hide apps on iPhone from your app store shopping history if you are active family sharing, anyone in your family group can see and download the apps you buy and download. If you want to keep some of your apps private, you can hide them from the App Store's shopping history. Open the App Store. Tap your profile icon or photo in the top right corner. Milk purchased. Find the app you want to hide. Swipe left in the app and hit Hide. Repeat for any other app you want to hide. Tap Done in the top right corner. Note: This doesn't delete or hide the app on your iPhone or iPad. This method only hides the app inside your shopping history inside the App Store. You also can't hide the app subscription from the family organizer in family sharing, even if you hide the app from purchases. Back up how to view your hidden app purchase. Open app store. Tap your profile icon or photo in the top right corner. Tap your Apple ID. You may need to enter your Apple ID password. Use Face or Touch ID if evoked. Tap Hidden purchases to find hidden apps. Back up can you hide apps on a pre-installed iPhone? yes! In many cases Apple allows users to hide Apple apps that come pre-installed on your iPhone. Apple's stock apps hide how to remove third-party apps. But you actually just delete the app icon, because the app data isn't deleted. From the home screen, tap and hold the app you want to hide. When the action menu opens, select Uninstall app. If Delete App is missing from the Action menu, then the app cannot be deleted.\* Repeat this process for all stock apps you want to remove. If you decide you need any of these apps in the future, simply re-download them from the App Store to get them back. \*While you can remove some apps like iPhone calculator and Apple Music apps Others, such as app Store and Camera apps, can't be deleted. Back up how to find hidden apps on your iPhone until an app is downloaded on your iPhone, and not hidden from Siri &amp; Search, you can use the search to quickly find a hidden app on your iPhone. If you want to find out which folder it is in, you'll need to type the full name of the program. From any house Scroll down from the middle of the screen to open the search. Type in the full name of the app you were looking for (ignore suggestions that appear under applications until you have entered the full name). If your app hasn't appeared yet, tap Search. The program should have a high result. If the app is hidden in a folder, the folder name will appear on the right side of the app icon. Tap the icon to open the app. Or open the folder on your home screen to find the app there. If the app is not on your iPhone, you'll see the right view of the app icon. Tap Show to download the app from the App Store. If the app doesn't show up, double check that you have the correct app name and spelling. Back up
